My name is Anastasia and i'm going to give you my opinion on that statement.

I don't really agree with it. For some people it's true but for some other it's not. If you have boring and not interesting life in computer games you can find new feelings. Games can give you abilities to do what you can't do in real life. But you need to not lose yourself in all that imagined world. Some people play video games too much and they can't understand where is real life and where is game. Because of it they may do some awful and illegal things.

Computer games can be good in finding new feelings. But you need always understand where is real life.
